

# Nikolay Sinitsa

## FullStack Web Developer

Hello! I'm Nikolay, I'm a student at BNTU with a passion for web application development and utilizing modern technologies. My tech stack includes JavaScript/TypeScript, Express.js, SQL, and Angular/React.

I see myself not as just a framework developer, but as an engineer who can expand their skills according to their development interests.

## Location

Minsk, Belarus

Ready to work from the office (full-time)

## Contact

koliasinitsa317@gmail.com

t.me/Vorobyshekkkkk

## Education

BNTU informatics

Bachelor

sep 2020 - jul 2024

Python, C#, Java, JS, SQL, PHP

## Expertise

Typescript/Javascript

Node.js/Express.js/Nest.js

Angular/Rxjs/PrimeNg

SQL/Postgres/Mysql/Prisma

React/Redux/material UI

## Language

English B1

Russian Native

## Work Experience

### FullStack Web Developer

#### Ittransition Minsk

Nov 2023 - Apr 2024

I worked on an online car rental service that included a user's personal account. This service allowed customers to rent cars and manage their orders through their personal profile. Additionally, the project included an administrative panel for viewing orders, managing the client database, and keeping track of employees.

Developed 13 tables in PostgreSQL and corresponding models in Prisma for storing application data.

Implemented registration and authentication mechanism using JWT on the back-end.

Designed REST API to facilitate interaction between the client and server sides of the application.

front-end: React, TypeScript, Material UI

back-end: Express, TypeScript, PostgreSQL, Prisma, JWT

### Front-end Developer

#### ModIS-M Minsk

feb 2023 - july 2023

Worked on a fintech project intended for internal use by bank employees. Specifically focused on developing components for the registration and processing of loan applications.

Collaborated closely with the backend development team to implement dynamic forms, tables, dialogs, and modals.

Rxjs · angular · PostgreSQL · PrimeNg · C# · Typescript Jenkins

### Node.js developer

Open Source mattermost.sptm.dev

Sep 2022 - Nov 2022

As a result, I have developed an application that provides a REST API for retrieving a list of books, adding new books through a message queue, and interacting with a collection of users through registration and authentication functionality.

Node.js · Prisma · Redis · Typescript · express.js Docker
